

PATIENT INSTRUCTIONS FOR ELECTRODIAGNOSTIC TREATMENT

This procedure is performed by applying electrodes to the surface of your skin. It is important that you prepare properly.

The skin, where the electrodes are to be attached, must be free of any lotions or oils and dead skin. A mild electrical stimulation will be used to evaluate the nerves ability to carry impulses.

DO NOT use any lotions, gels or oils of any kind on your skin the day of the test

Treatment can range from ½ to 1 hour. You will be advised upon scheduling. Try to arrive 15 minutes early to fill out a patient history form. Please use the restroom facilities prior to the examination. You will be either seated in a chair or in lying down with your eyes closed in a relaxed state throughout the procedure. Please do not bring young children with you.

Please have your meals as you would normally would. Please take all medication as directed and bring a list of any current prescribed for your use. If you wear corrective lenses, please wear or bring them with you. Necklaces, rings and bracelets CAN NOT be worn during an upper body series. Please remove your jewelry prior to your appointment.

The information from this procedure will provide your doctor with valuable information about your neurological system and can determine the extent and location of damage that may have occurred as a result of your injury or illness.
